

Hari Hara Sudhan

Technical Support Engineer | Lenovo-Certified Field Engineer | Windows, Hardware & Networking | Python Automation & AI Tools

+91 8838759794 | trhariharasudhan@gmail.com | Salem, Tamil Nadu (open to Bengaluru / Coimbatore / Remote) | [linkedin.com/in/trhariharasudhan/](https://www.linkedin.com/in/trhariharasudhan/) | github.com/trhariharasudhan | trhariharasudhanportfolio.vercel.app/

Professional Summary

Technical Support Engineer who learned the job in the field — nine months on Lenovo's enterprise support project in Bengaluru, getting dead machines running again in front of the customer. I work a fault down to the component — BIOS-level diagnostics, hardware replacement, Windows recovery, driver troubleshooting — and check the network side too: IP configuration, DNS and DHCP, router and switch handling. Completed 100+ Lenovo and Motorola service and support certifications on that project, plus a 12-course Microsoft Cloud Support Associate program in Azure, secure networking and technical diagnostics. Alongside support, I build my own tools with Python, FastAPI and local AI models — I would rather automate a repetitive problem than repeat it. Fluent in Kannada (spoken), Tamil and English. Immediate joiner.

Experience

Technical Support Engineer – Lenovo Project | Skypro Technologies Pvt Ltd | Bengaluru, Karnataka | Nov 2024 – Jul 2025

- Handled 6–8 onsite and remote support calls daily for Lenovo laptop and desktop customers, closing approximately 80 tickets per month.
- Diagnosed hardware failures and performed component-level replacement of motherboards, display panels, keyboards, SSD/HDD, RAM, and batteries.
- Performed BIOS-level diagnostics and configuration using Lenovo's proprietary OEM diagnostic tools.
- Installed, recovered and reconfigured Windows OS and device drivers on-site, restoring customer systems within SLA.
- Coordinated part escalations with Lenovo's backend engineering team; maintained detailed service logs and case documentation.
- Completed 100+ Lenovo and Motorola product certification modules to maintain certified field engineer status.

Web Development Intern | Immaculate Technologies | 2023 | 2 Months

- Built the frontend of an e-commerce web application using HTML, CSS, and JavaScript.
- Worked on responsive layouts and UI debugging and participated in code reviews and technical documentation.

Technical Skills

- **Hardware Support:** Laptop and desktop diagnostics; motherboard, display panel, keyboard, SSD/HDD, RAM and battery replacement; BIOS configuration; OEM diagnostic tools
- **OS & Software:** Windows 10/11 installation, recovery and troubleshooting; driver management; Linux and Kali Linux (terminal / CLI basics); Microsoft Office; Outlook
- **Networking:** IP configuration, ipconfig / ping / tracert, DNS and DHCP basics, router and switch handling, LAN troubleshooting
- **Support Operations:** Onsite and remote support, remote access tools, incident handling, L2 / OEM escalation, service log and case documentation, SLA adherence
- **Programming & Web:** Python (basics), HTML5, CSS3, JavaScript, SQL (basics), REST API concepts
- **AI & Dev Tools:** Working knowledge of LLM fundamentals, RAG and prompt engineering; Ollama for local models; VS Code, Cursor, Git and GitHub, pip and virtual environments
- **Currently Learning:** Python scripting, Linux administration, Cybersecurity fundamentals, routing and switching

Certifications

- **Lenovo & Motorola Service and Support Certifications** — Lenovo, Nov 2024 – Jul 2025 · 100+ OEM service and support modules completed during the Lenovo project
- **Microsoft Cloud Support Associate Program** — Microsoft (Coursera), 2025 · 12 courses: Azure services, secure networking, technical diagnostics, M365, backup and security administration
- **Security Operations Center (SOC)** — Cisco (Coursera), 2025 · Security operations and incident response fundamentals
- **Introduction to Technical Support** — IBM (Coursera), 2025 · IT support workflows and customer case handling
- **Introduction to Information Technology and AWS Cloud** — AWS (Coursera), 2025 · IT fundamentals and AWS cloud concepts
- **Crash Course on Python** — Google (Coursera), 2025 · Python fundamentals for IT automation
- **Also:** Naan Mudhalvan – Microsoft (2023), 14 Office 365 and cyber-security modules; Infosys Springboard (2023), 6 courses in AI, deep learning, NLP and GPT models.

Projects

Grandpa — Local Windows AI Assistant (in development) Python, FastAPI, Ollama, SQLite | github.com/trhariharasudhan/Grandpa

- Building a local assistant for Windows that handles reminders, CLI commands and task automation, running a language model locally through Ollama instead of a cloud API.
- Designed with a plugin-based architecture, new capabilities can be added without touching the core.

FocusFlow — Productivity Chrome Extension JavaScript, HTML, CSS, Chrome Extensions API | github.com/trhariharasudhan/FocusFlow

- Chrome extension that filters distracting YouTube content using category-based rules, with preferences stored locally in the browser.
- Built with a modular structure so filter categories can be extended without changing the extension logic.

Education

Master of Computer Applications (Distance / ODL) | AVS College of Arts and Science | Periyar University | 2026 – present

Bachelor of Science in Computer Science | Salem Sowdeswari College | Periyar University | 2021 – 2024

Higher Secondary (HSC) | Computer Science with Mathematics | **The Gugai Higher Secondary School**, Salem | 2019 – 2021

Languages

Tamil (Fluent – speak, read, write) | English (Professional – speak, read, write) | Kannada (Fluent – spoken; mother tongue)
